Nullify Globalism in Arizona With HB 2775

Legislation has been introduced in the Arizona State Legislature to nullify multiple globalist organizations, including the United Nations (UN), World Health Organization (WHO), and World Economic Forum (WEF). ***It is imperative that legislators enact this bill and protect our God-given freedoms!***

House Bill 2775 (HB 2775) is sponsored by Representative Khyl Powell (R-Gilbert). It declares:

> A. Notwithstanding any other law and except as required by a court order, an agency of this state, a political subdivision of this state or an employee of an agency or political subdivision of this state acting in the employee's official capacity may not do any of the following:
>
> 1. Knowingly and wilfully participate in any way in the enforcement or implementation of any rule, regulation, fee, tax, policy or mandate of any kind of an international organization.
> 2. Use any assets, state monies or monies allocated by this state to political subdivisions of this state on or after the effective date of this section, in whole or in part, to engage in any activity that aids an international organization in enforcing or implementing any rule, regulation, fee, tax, policy or mandate of any kind in this state.
>
> B. For the purposes of this section, "international organization" includes all of the following:
>
> 1. The World Health Organization.
> 2. The United Nations and any United Nations agency.
> 3. The World Economic Forum.
> 4. The Bank for International Settlements.
> 5. The International Criminal Court.
> 6. The International Monetary Fund.
> 7. The North Atlantic Treaty Organization.

The policies emanating from the UN, WHO, WEF, and the other listed international organizations are antithetical to the American form of government. For example, the UN's Agenda 21/2030 plan seeks total control and regimentation of the entire planet, and prominent examples of its implementation include the global war on farmers, carbon-capture pipelines, and the transition toward "green" energy. The global body's "Summit of the Future" advocated more power for the UN.

Furthermore, the WHO is planning a major power grab to allow it to impose draconian restrictions, such as vaccine passports and other "health" measures, at a global level. This comes in the form of a proposed global "pandemic treaty" and amendments (agreed upon in 2024) to the International Health Regulations (IHR). In addition to advancing medical tyranny, these changes would empower international bureaucracy at the expense of American sovereignty.

Article VI also says, "This Constitution, and the Laws of the United States *which shall be made in Pursuance thereof* … shall be the supreme Law of the Land." (Emphasis added.) State legislators are required to uphold and implement only those laws that are "made in Pursuance" to the Constitution. Any laws not "made in Pursuance thereof" are therefore *not* the supreme Law of the Land and, as such, state legislators are under no obligation to enforce or carry out their provisions. Instead, they should interpose, or nullify, such laws within the boundaries of their state.

This stipulation applies to the treaty-making power. Treaties (including U.S. membership in the UN and WHO) must also be subject to, and bound by, the limitations of the Constitution.

In a letter dated September 7, 1803, then-President Thomas Jefferson wrote, "I say the same as to the opinion of those who consider the grant of the treaty making power as boundless. If it is, then we have no Constitution." This was further affirmed by the Supreme Court of the United States, in *Reid v. Covert* (1957).

Urge your state representative and senator to support HB 2775 and to push back against all other unconstitutional laws at every level of government.
