JBS Successes

Growing Our Influence at the Reawaken America Tour

by Heather Hobbs, *Field Coordinator for Northern Texas*

The Reawaken America Tour has been crisscrossing the nation. In December we were blessed to be able to attend the Dallas conference with tables for The John Birch Society and *The New American* magazine. It was a three-day event featuring well-known speakers, many of whom we interviewed, including Dr. Peter McCullough, America's Frontline Doctors, Alan Keyes, and Allen West (you can watch these and other interviews at <https://thenewamerican.com/video/>).

Our JBS booth had a sign-up sheet for those interested in more information about what we do, and it led to many new members or attendees at our meetings. It was a remarkably busy event that had over 4,000 people gather to hear the truth about what is occurring in our country. We had a lot of materials go out to guests, and because of our presence we received invitations to the rest of the Reawaken America Tour events. Not only were we successful in sharing our organization, but we also were successful in growing our influence!
