JBS CEO Art Thompson's weekly news video update for March 30 – April 5, 2015.

In this week's Analysis Behind the News video, JBS CEO Art Thompson discusses how the Munich Security Conference is sort of like a Bilderberger meeting in that it sets the stage for manipulating the political future of Europe and North America; how Strobe Talbott, President of the Brookings Institution, spoke at a recent Munich Security Conference about how the "European Project" was always intended to politically integrate both Europe and the United States; how ties between backers of the Trans-Pacific and Trans-Atlantic trade partnerships and backers of Article V conventions are coming to light with their shared purpose of changing the Constitution; how the Second Amendment would be threatened by a new constitutional convention (Con-Con); and how the Council on Foreign Relations continues to promote political integration of the EU and U.S. as well as the political integration of the United States, Mexico, and Canada (aka North American Union).
