The Power of 500: 100/10/6 Program

The Power of 500 is The John Birch Society's long-standing and successful strategy for creating an informed electorate, which is the only long-term solution to restore and keeping America free and independent. This strategy involves building understanding about how to affect change in a constitutionalist direction; the necessity for organizing; and the influence of 500 organized patriots, using the "100/10/6 Program," to work towards common goals in one congressional district.
