

## Save Our Children from Public Schools — Overview

Public schools have been failing America's youth for decades. But they aren't just dumbing down the next generation — they are systematically brainwashing students with harmful ideologies. Public education has been instrumental in producing an increasing number of anti-America, amoral, and socialist-minded adults. That's why The John Birch Society has launched our "Save Our Children from Public Schools" action project. It is imperative that Americans take their children out of the public school system and pursue superior alternatives.
