

DOLLARS AND SENSE

AN OVERVIEW OF HOW THE WORLD OF
MONEY AND POLITICS REALLY WORKS

Presented By: Dr. Steve Bonta

Named after the original “Dollars and Sense” presentation created by John F. McManus, the late president of The John Birch Society, this presentation by Dr. Steve Bonta picks up the mantle, offering audiences a primer on how money and the economy work. In this condensed 18-minute version of his presentation, Dr. Bonta focuses on one topic: inflation. He clears up common misconceptions about inflation, explains how inflation has been used to carry out a Marxist agenda, and discusses the need to abolish the Federal Reserve and restore honest incorruptible money via a return to the gold-and-silver standard.
