# VACCINE DERIVED VIRUSES?

The Associated Press recently reported that the week after the World Health Organization announced that the continent of Africa was free of the wild polio virus, a new polio outbreak in the country of Sudan is linked to an ongoing vaccine-sparked epidemic in the African country of Chad.

Two days later, the head of the World Health Organization said he would not recommend any COVID-19 vaccine before it is proven safe and effective. We'll look at these claims that will soon hit very close to home in this episode of Analysis Behind the News, where we provide the perspective that you can use to restore American liberty and independence.
