TRUMP *TO EXIT* WHO?

In a welcome announcement, President Trump indicated last week that he had begun the year-long process of getting out of the World Health Organization.

He had threatened to do so and withheld funds from the WHO in April, after it was revealed that the organization had helped to cover up China's deliberately misleading claims about the COVID-19 Wuhan virus.

After an investigation exposed China's irresponsibility and deceit, President Trump said in a statement, "China has total control over the World Health Organization."
